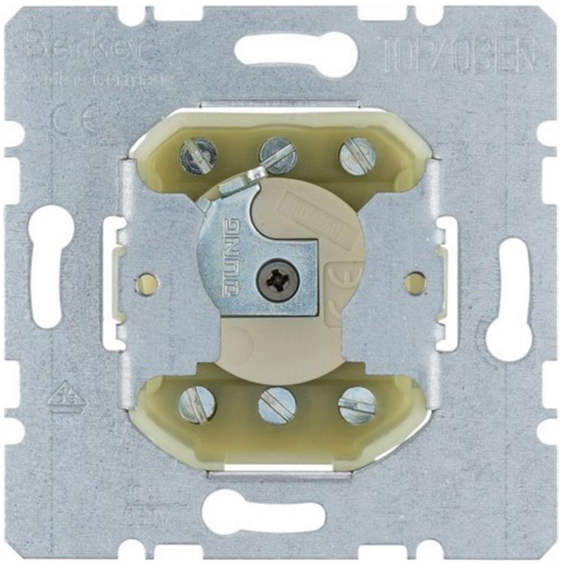
Product sheet



BERKER | Cylindrical key switch bipolar pushbutton 383210

Brand: HAGER

Reference: HAGER 383210

Bipolar switch for shutters with key and without screw fixing expansion claws. This screw terminal switch has a nominal current and voltage of 10A and 250V AC. Thus, the piece has an interlocking function and IP20 degree of protection, being indicated for central locking systems. In addition, along with this mechanism, the brand offers a variety of products focused on the intelligent management of buildings, establishing the quality of its materials and its innovative but timeless design as fundamental pillars, all without sacrificing functionality.

Description

BERKER | Cylindrical bipolar pushbutton key switch 383210 What to know when buying the Berker electric mechanism The Berker range of electric mechanisms is common to all the following series: S.1, B.3, B.7, S.1, B.3, B.7, Q.1, Q.3, Q.7, K.1, K.5 , Arsys, R.1, R.3, and R.8 The general structure of this complete mechanism is: Mechanism + frame + key or cover < p> The modular system with the greatest number of aesthetics and types of materials. The breadth of shapes, colors and materials (glass, steel, aluminum, porcelain, concrete, ...) allows to combine the concepts of Quality, Functionality and Design. Suitable solutions for the decoration of any environment, in all its functionalities, both in conventional and electronic mechanisms and in building control and management. Berker electrical mechanisms < p> As the inventor of the modular system, Berker has a single mechanism for different aesthetics. The current mechanisms are left on the wall. Only aesthetic ones are substituted. Even if a control switch or an illuminated switch is desired, the mechanism is always the same. This means that: - There are no wrong mechanisms in the installation - Minimum stock - Long-term customer satisfaction Berker design and functionality Tried and tested modular design and Extremely flat angle of only 3.5º makes the switch look very flat on the wall. For ease of installation, the concept of Flexolift clamps was created. The claws snap flush and are automatically forced into position when released. On the back of the switch is a laser engraving of the circuit diagram, graphic symbol, and length of uninsulated conductor length required for connection. On the front, the reference of the mechanism stands out to be able to identify it very easily.

Specifications

EAN	4011334190745
Manufacturer	Hager
Piece type	Electrical mechanisms
Series	Berker
