Simon 100 | Minimum horizontal frame of 3 elements matt white 10001630-230 New colors of Simon 100

The available colors of the Simon 100 catalog have been updated. To the colors black and white gloss, now matte black and white colors are added, to customize the installation projects a little more.

This series of mechanisms is constantly evolving, adding new functions to make life easier.

More information about the Simon 100 series

Simon 100 was born with the purpose of simplifying people's lives. Its main feature is usability, since it is designed to facilitate the interaction with users. It is a revolutionary line in terms of usability, aesthetic and technical innovation as it is the first interface with a push operation to be used by hand.

Its horizontal keys with a push operation allow a surface of maximum interaction, always of the same size and with the same drive. In addition, the matrix layout of the keys is more intuitive and easy to remember. Also, the **Simon 100** kits group functions in a minimum way for each room so that users can cover all their needs under a clean aesthetic without lines.
