Description

The Ruko-272180 tap is a high-precision tool designed for creating through threads in a variety of soft materials. Manufactured with a reinforced shank, this tap is ideal for machine use, ensuring optimal and long-lasting performance. Its design allows for thread tapping in a single step, simplifying the machining process and ensuring consistent, high-quality results. This tap is especially suitable for working with materials such as aluminum, aluminum alloys, bronze, copper, nickel, and plastics, making it a versatile choice for various industrial and DIY applications. right
