Description

Guide Drill Bit For Bimetal Crowns

The Guide Drill Bit For Bimetal Crowns is an essential tool to precisely mark the piece to be drilled, preventing the drill bit from sliding across the surface of work. Its design includes a diameter of Ø 6.5mm, ideal for drilling accurately and without setbacks. This centering bit sits securely in the spindle of the bimetallic crowns, guaranteeing efficient and professional work. With this tool, you will be able to make clean and precise holes in different materials, without the risk of deviations or errors. Ensure the quality of your work with the Bimetal Crown Guide Drill.

- Diameter [mm]: Ø 6.5mm
