Description

The Televes TV+SAT dotted pass-through socket is a pass-through box with two CEI connectors that allows the connection of television and satellite in a single device. Made of high-resistance zamak, this socket has high shielding for better signal quality. Its bridged design ensures that the entire FM, TV and satellite input signal is available on both connectors, allowing multiple sockets to be installed in series. Compatible with coaxial cables with a jacket diameter of 5mm to 7mm, this pass-through socket is ideal for cable and satellite television installations in the home.

Pass-through box with two CEI connectors (male on the left and female on the right)
