Product sheet

Reduced hexagonal brass m3/4-h1 7431

Brand: CIS

Reference: ALM 3236.0756

Brass hexagonal reducer with M3/4-H1 thread, model 7431. Made of corrosion-resistant material, ideal for hydraulic and pneumatic applications. Its hexagonal design facilitates adjustment and installation. Compatible with standard pipe systems, it guarantees a secure and long-lasting seal. Perfect for connections in industrial and domestic environments, offering high quality and reliability in use.

Description

The M3/4-H1 threaded brass hexagonal reducer, model 7431, is an indispensable component for hydraulic and pneumatic applications. Made of corrosion-resistant material, this piece guarantees a secure and long-lasting seal in standard piping systems.

Its hexagonal design makes it easy to adjust and install, making it ideal for connections in industrial and domestic environments. With high quality and reliability in use, this hexagonal reducer offers exceptional performance in any situation.

With this piece, you can enjoy a secure and long-lasting connection in your projects, without having to worry about possible leaks or sealing problems. Its compatibility with standard systems makes it a versatile and practical option for any type of installation.

Don't miss the opportunity to acquire this brass hexagonal reducer, a high-quality component that will guarantee optimal performance in your hydraulic and pneumatic applications. Get yours today!

Specifications

EAN	8435136703921
Material	Latón
