Description

700ml Total Sprayable Polyurethane Foam is a high-quality product designed to provide maximum thermal and acoustic insulation in construction projects. With high UV resistance, this foam helps reduce thermal bridging, improving the energy efficiency of any structure. Key Technical Features:

- Capacity: 700ml
- Type: Total Sprayable Polyurethane Foam
- Superior Thermal and Acoustic Insulation
- UV Resistance
- Reduces Thermal Bridging
- Ideal for construction projects

This polyurethane foam is easy to apply and expands to quickly fill any space, creating an airtight seal that helps prevent air infiltration and heat loss. Its versatility makes it perfect for a wide range of construction applications, from sealing joints and cracks to filling gaps and cavities. Whether you're working on a renovation project or building a new structure, Total Sprayable 700ml Polyurethane Foam is an excellent choice for improving your building's insulation and energy efficiency. With its excellent performance and durability, this product is a smart investment for any construction professional.
