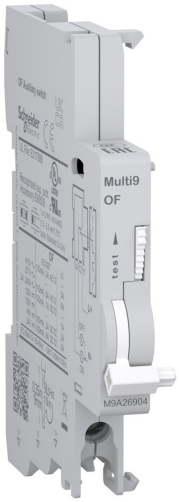
Product sheet



Multi9 M9A 0.1-6A switch with bottom connection and auxiliary protection.

Brand: SCHNEIDER

Reference: IMPO M9A26904

The Multi9 M9A OF is a bottom-wiring device designed for currents from 0.1 to 6A. Ideal for auxiliary applications, it offers an efficient and safe solution for electrical management in industrial and commercial environments.

Description

The Multi9 M9A OF is a connection device designed for low-current applications, enabling efficient and safe installation in electrical systems. This model is designed to handle currents up to 6A, making it an ideal choice for various auxiliary applications. Its robust and compact design facilitates integration into electrical panels, ensuring optimal performance and a long service life. Bottom-mounted wiring ensures a neat and accessible installation, allowing for quick and easy maintenance. This product is compatible with a wide range of accessories, making it versatile for different electrical configurations.

- **Model:** Multi9 M9A OF
- **Connection Type:** Bottom Wiring
- **Current Range:** 0.1-6A
- **Nominal Voltage:** 230V
- **Dimensions:** Compact for easy installation
- **Material:** Impact-resistant plastic
- **Certifications:** Complies with international standards
- **Applications:** Auxiliary electrical systems
- **Compatibility:** Multi9 Accessories
- **Installation:** Quick and easy, with direct access to connections

Specifications

Rated current (A)	6
EAN	3606486351802
