

## Product sheet

# Blinds master iO batteries Simon 100 white gloss SIMON 10002181-130

Brand: SIMON

Reference: SIMON 10002181-130

It is a master iO button for blinds that has a battery, specifically a 3.3 V ~ button cell. This half-element control mechanism consists of metal parts with insulation made of halogen-free thermoplastic, which means that it has been manufactured with the intention of offering maximum security at home. The push button is recessed and offers a simple and uncomplicated installation. It is included in the Simon 100 series, being compatible with the frames of the same collection. This series represents a further step in the development of command mechanisms. It is presented as a true revolution in terms of usability and aesthetics. The series provides a new way to interact with devices. These allow for easier, more comfortable and more intuitive handling. For the Simon 100 series nothing is impossible and it makes a huge difference in the way of living both in homes and in public spaces.
