Description

The Schuko ONLEX Embedded Plug is an electrical security device designed to connect equipment to the home network, manufactured with robust technology and finished in white. Its main function is to ensure a stable and safe power supply for appliances, offering protection against electric shocks thanks to its integrated grounding.

Technical characteristics

- Material: High quality ABS resistant
- Connection type: Schuko with integrated grounding
- Pack: 5 units per kit
- Colour: White
- Installation: Fixed by screws to the frame
- Compatibility: Combinable with frames of the same series

This plug provides a reliable connection for any electrical device, ensuring that the user operates calmly when having an effective grounding system. Its compact design allows to integrate perfectly into any recess panel without compromising the aesthetics of the home and the functionality of residential or commercial spaces.

The installation is simple and quick, requiring only the use of the included screws to attach the device to the corresponding frame. This process facilitates the maintenance and updating of electrical connection points in any environment where safe access to the power grid is required.

Specifications
