Product sheet

O-rings - 63 x 8mm - BULK

Brand: GIBALTO

Reference: GIB 002390

O-rings are essential elements in sealing applications, designed to prevent fluid leaks in various industries. Their circular geometry allows for a precise fit in different assemblies, ensuring an effective and long-lasting seal under various conditions. Their versatility makes them key components in mechanical systems.

Description

63 x 8 mm O-rings are essential components in fluid sealing applications, designed to provide effective sealing in a variety of systems. These seals, with their circular section ring shape, are widely used in industrial sectors where leak prevention is crucial.

- Inner diameter: 63 mm
- Section thickness: 8 mm
- Material: High-strength composite to ensure durability and optimal performance
- Sales format: Available in bags of 100 units or in bulk
- EAN13 code: 8432453002390
- Applications: Suitable for hydraulic, pneumatic and other industrial applications
- Resistance: High resistance to pressure and temperature, guaranteeing a secure seal
- Compatibility: Compatible with a wide range of fluids, including oils and fuels

Specifications
