Key Simon 82 with neutral viewer cava SIMON 8200013-034

Brand: SIMON

Reference: SIMON 8200013-034

Individual key for S. 77 mechanisms, combinable with the 82972 and 82982 viewers, cava Simon 82. That a key has a viewer allows us to know its location at all times, even in the total absence of light. This element is present in the individual key for mechanisms included in the Simon 77 series. 55x55 are its dimensions and can be combined with the Simon 82 series cava viewers, a circumstance that allows it to act as protection against all kinds of shocks. Its installation can be carried out on the surface or embedded, granting greater functionality to it. The fact of having been made with galvanized thermoplastic ensures a longer duration over time, which translates into economic savings. The recommended temperature range is from 5 to 40° C, but this cover can withstand temperatures from -25° to 50° perfectly, with excellent performance in all types of environments. All with a relationship between quality and price that is unmatched by the companies that manufacture these types of keys in competition.
