Product sheet

Differential - 70 - 80W, KRANG

Brand: KRANG

Reference: GIB 004179

Device designed to safeguard people in electrical environments, ideal for residential applications. It supports currents of 25 to 40 amps and has a sensitivity of 30 mA, ensuring effective protection against direct and indirect contact and insulation failures in electrical installations.

Description

The 70-80W bipolar residual current device is designed to ensure safety in electrical installations, protecting people from direct and indirect contact with live parts or branches caused by insulation faults. This residual current device is suitable for use in domestic environments, providing an additional layer of safety.

- Nominal current: 25/40 amps.
- Sensitivity: 30 mA, allowing rapid detection of current leaks.
- Bipolar design, ensuring complete protection by disconnecting both poles in the event of a fault.
- Operating voltage: 70-80W, suitable for most domestic applications.
- EAN13: 8435240704548, for easy product identification and reference.
