Description

The 40x50 nickel-plated security cylinder is an advanced solution for door protection, designed to offer a high level of security and resistance against unauthorized manipulation attempts. This model combines cutting-edge technology with high-quality materials to ensure optimal performance in a variety of conditions.

- IT-18 security cylinder: Provides a superior level of protection thanks to its robust design and advanced features.
- Anti-pick steel sheets: Increase the cylinder's resistance to forced extraction attempts.
- Double clutch: Allows the cylinder to operate even if a key is inserted on the opposite side, improving convenience and security.
- Anti-drill: Designed to resist drill attacks, protecting the cylinder's internal components.
- Anti-pick: Provides protection against lock-picking techniques, making it difficult to manipulate the internal mechanism.
- Anti-bumping: Incorporates technology to prevent the use of bumping techniques, one of the most common ways to force locks.
- Anti-copy technology: Prevents unauthorized key duplication, ensuring that only the authorized persons can access.
- Brass finish: Provides an elegant and corrosion-resistant appearance, maintaining its appearance over time.
- Size: 40x50 mm: Standard dimensions that ensure compatibility with a wide range of doors.

Specifications

Colour	Níquel
EAN	8432211147755
