Product sheet

Group key 1 switch + 1 button Simon 82 graphite SIMON 82027-38

Brand: SIMON

Reference: SIMON 82027-38

Double key for group of 1 switch and 1 button with engraved bell graphite Simon 82. With graphite finishes and measures 55x55mm, this double key is specifically designed to be used in compositions of a switch and a button of the Simon 82 series. You can find it also in up to 6 different shades. In any case, we recommend that the frame be the same color as that of the chosen key socket. For its installation, you can choose between placing it on a surface or embedding the key. Thanks to its manufacturing in thermoplastic material, it will be able to withstand temperatures ranging between 5 and 40º, and can reach a maximum of -25 and 50º. The simple care of the key will be based on simply wiping a soft cloth moistened with a soap and water solution, avoiding in any case any product that contains chlorine in its formulation.
