Description

The **Kukko-30-1+S** is a 3-legged universal bearing puller specifically designed for tight and hard-to-reach spaces. Its innovative design includes slim pull hooks that allow operation in confined areas, ensuring efficient and safe removal. Thanks to its manual adjustment knurled knob, the hook can be quickly released and slid onto the crossbar without the need for additional tools, optimizing working time.

This puller is versatile, as it can be used as both an external and internal puller simply by rotating the pull hooks. Furthermore, it is suitable for removing asymmetrical machined parts, making it an indispensable tool for professionals and DIY enthusiasts alike.

The uniform distribution of force ensures concentric extraction and a firm grip on the parts being extracted, such as bearings, pinions, and gear wheels. The Kukko-30-1+S includes a special grease tube to keep the spindle properly lubricated, guaranteeing optimal operation and extending the product's lifespan. Its new, optimized guide rail geometry allows for easy movement and secure leg attachment, ensuring maximum stability during use.

- Universal 3-leg puller for tight spaces.
- Slim pull hooks for limited access.
- Manual adjustment knobs for quick adjustment.
- Use as an external and internal puller.
- Suitable for asymmetrical machined parts.
- Even force distribution for concentric extraction.
- Includes Kukko special grease tube.

- Easy movement and secure leg attachment.
- Optimized design for maximum stability.
- Ideal for bearings, pinions, and gear wheels.

Specifications

High	21,20
Width	5,00
EAN	4021176756894
Manufacturer	Kukko
Weight (kg)	1,1000
Depth	15,20
