Description

Description

To install a cover plate, a box must be placed in the wall or masonry where the plate will subsequently be fixed.
In cases where it is not desired or possible to cut a recess in the wall for a flush-mounted box (marble facades, stone, etc.), the use of a surface-mounted box is recommended.
The depth is only 33mm., and its design integrates perfectly with the aesthetics of the cover plate.
When combining multiple cover plates, the use of the separator set is not required.
Available in all series. Select the box of the required series, as appropriate.

Technical specifications

SERIE 6
Dimensions: 130x294x33 mm (horizontal-vertical-depth).

Weight: 0,29245 kg

Packaged product dimensions: 29,6x13x3,4 cm

EAN 13: 8424299070667
