Product sheet

16A K45 single-pole push button with pilot light SIMON K304

Brand: SIMON

Reference: SIMON K304

16A 250V button with built-in light and Simon K45 quick terminal connection system. Designed for offices and work areas, the button with built-in light from the Simon 45 collection is the perfect option to combine functionality, innovation and practical design in the same space. With this button with signaling function, you can mark the mechanism and find its position in low or no light situations. In addition, it includes a rocker function and it is compatible with a supply voltage of 250 Volts and 16 Amps of intensity. It is made up of insulated metallic materials with halogen-free thermoplastic and a trim made of the same material, to guarantee protection in case of fire. It consists of 1 module for half an element in a dimension of 22x45mm and with an admitted cable section of up to 1.5mm and stripped of 11mm. Its installation is suitable for recessed or surface mounting and with a quick terminal connection system. 2 narrow key mechanisms cannot be combined in one adapter plate from Simon 500 Cima to Simon 45.
