Product sheet

NSX1 interlock dispenser with chassis, compatible with electrical systems.

Brand: SCHNEIDER

Reference: IMPO LV429286

NSX1 Chassis Locking Device (Does not include lock) is a component designed for chassis interlocking systems. Its robust structure ensures a precise and secure fit, ideal for industrial applications. Compatible with various configurations, it offers an efficient solution for equipment assembly.

Description

The NSX1 chassis interlock (excluding lock) is an essential component designed to ensure the safety and proper functioning of interlocking systems in various industrial applications. Its robust structure and optimized design allow for easy integration into existing chassis, providing a reliable solution for access control and machine protection. This device is characterized by its high strength and durability, making it an ideal choice for demanding work environments.

- **Material:** Made of high-strength steel.
- **Dimensions:** Compact, ideal for confined spaces.
- **Compatibility:** Designed to integrate with standard interlocking systems.
- **Installation:** Easy to install, no specialized tools required.
- **Safety:** Provides an additional level of safety in machinery operation.
- **Durability:** Resistant to harsh environmental conditions.
- **Performance:** Ensures efficient and reliable operation.
- **Certifications:** Complies with industrial safety regulations.
- **Use:** Ideal for applications in factories and production plants. and industrial environments.
- **Maintenance:** Requires low maintenance for optimal performance.

Specifications

EAN	3606480021343
Reference	SCHNEIDER LV429286
Series	Solera Mural
