OFIBLOCK PLUS profile 3 useful mechanisms graphite gray SIMON KFP103 / 14

Brand: SIMON

Reference: SIMON KFP103/14

Ofiblock Plus aluminum profile with 3 elements graphite Simon K45. The Simon K45 range of products features the Ofiblock Plus 3-element aluminum profile, which has elegant graphite finishes and measures 69x220x74mm. It is a profile that has a greater depth to allow a more comfortable distribution of the wiring inside, improving the bend radius of the wiring. It has 3 modules and has been made of anodized aluminum, while the frames and side covers are made of halogen-free, self-extinguishing thermoplastic. Thanks to this, the non-spread of flames is guaranteed in the event of a hypothetical case of fire and very low toxicity in the event of a smoke emission. Finally, this product is totally suitable for installing on walls, furniture, raised floors, metal surfaces with a magnet or even on a DIN rail. Because at Simon we always try to ensure that our products are always versatile and easy to install.
