Simon 75 BRAND-REX universal adapter module SIMON 75001-39

Brand: SIMON

Reference: SIMON 75001-39

Adapter piece for AMP® RJ45 computer connectors on Simon inclined plates. Sometimes we have problems adapting the shots of the different computer and electronic elements that we have. To solve these problems, many people have relied on the Simon 75 Series AMP® RJ45 Format Computer Connector Adapter Part. This is an adapter part for use exclusively on inclined plates. Thermoplastic is the material with which this product has been manufactured, which is designed for a temperature range of 5 to 40° C and a maximum temperature of -25 to 50° C. Its adapter module is universal, so it can be used in different points of our homes or companies. Like all the articles included in the range of the 75 series, its price is another of its attractions, always if you give up the highest quality in each piece.
