Description

The Leica NA524 automatic optical level is a measuring tool designed to meet the most demanding requirements of the construction industry. With 24x magnification and a deviation of only 1.9 mm, this device guarantees fast and accurate measurements, making it an indispensable tool on any construction site. Its distinctive design and proven technology ensure exceptional performance, even in the most adverse conditions.

Leica Geosystems, with its extensive experience in the sector, has developed the NA524 to deliver the highest quality results, adapting to all leveling needs. This optical level is ideal for professionals seeking reliability and precision in their measurements, backed by an outstanding warranty and the support of more than 270 service centers worldwide.

- Free target diameter: 36 mm
- Shortest sight distance from axis:
