### Simon 75 mechanism for switch + bell button SIMON 75301-39

Brand: SIMON

Reference: SIMON 75301-39

Group of 1 10AX 250V switch and 1 10A 250V button with quick terminal connection system. Providing a precise response to the new demands of the market is one of the objectives of all the people who work at Simon. With this objective, the Group has been created with a 10AX 250V switch and a 10A 250V button with a quick terminal connection system from the Simon 75 series. Its quick and easy installation is one of its attractions, being suitable for surface and flush mounting. It is a valid mechanism for Simon 75, 82 and 88 series and its installation must be done in a vil544 universal box. It is designed to withstand extreme environmental conditions thanks to the metal components with halogen-free thermoplastic insulation with which it has been manufactured. Its technical characteristics are completed with a cable section of 0.2 to 0.5mm and a stripping of 11mm cable. Best quality at the best price.
