Disconnect push button mechanism Simon 75 SIMON 75152-39

Brand: SIMON

Reference: SIMON 75152-39

Disconnection button (when pressing opens the circuit) 10A 250V with fast terminal connection system. The control mechanisms allow us to activate or turn off the electrical systems in a comfortable, fast and simple way. One of the most widely used in public and private buildings is the disconnection button (when pressing it opens the circuit) 10A 250V with fast terminal connection and tilting operation included in the Simon 75 series. Suitable for surface and flush mounting, this button has the possibility of implementing the signaling function by means of signaling support and key with display. It has been manufactured with metal components with halogen-free thermoplastic insulation, materials that make it a highly resistant piece to accidents and shocks and durable over time. This push button has a cable section of 1.5 to 2.5mm and a stripping of 11mm cable, having an affordable price for all types of budgets.
