SIMON 75804-39 Pass-Wait Mechanism

Brand: SIMON

Reference: SIMON 75804-39

Pack pass-wait mechanism and display. Start-stop mechanism and performance display pack. For its correct operation, the diffuser 82096 and the key 82013 (not included) are necessary. The "pass-wait" mechanism belongs to the Simon 82 series, works at 250V and is suitable for surface and flush mounting. The cable section should be in the range of 1.5mm and 2.5mm and the cable stripping should be 8mm. It is made of metal components with thermoplastic and halogen-free insulation and perfectly complies with current regulations. The temperature range in which the product operates at full capacity is from 0 to 40°C. The Simon 82 series is one of the most efficient in terms of electrical performance. Its operation requires a key and a diffuser. Thanks to the design and comfort that has been proposed to offer in this series, you can equip your premises with this mechanism to optimize performance in terms of services.
