

## Product sheet

## Simon 75 switch mechanism with handle SIMON 75203-39

Brand: SIMON

Reference: SIMON 75203-39

Pull handle switch 10AX 250V with screw terminal connection system. Knob switch that works with an intensity of 10AX and a power of 250 V with screw terminal connection system, the element is located in the category "control mechanism" and belongs to the Simon 75 series. It works by type of handle and makes easier to install thanks to its surface or recessing ability. Regarding manufacturing, the highest quality is always used in terms of metal components with halogen-free thermoplastic insulation. Take advantage of the maximum compatibility with the mechanisms of the Simon 77 series that will make it possible to leave the element installed in two simple steps: insert and press, it will be worth with those two simple movements to keep the mechanism working. Try to adapt the elements to any part of your home the infinite combinations with an endless number of colors and finishes available.
