Product sheet

Brand: SIMON

Reference: SIMON 10002621-130

This minimum vertical 2-element frame, suitable for 3 modules, in white, from the Simon 100 series, is the ideal base on which to support the rest of the mechanism components. Here, an effective and elegant white finish with a glossy effect is combined with the best materials that guarantee great durability. Regarding installation, you must take into account that it is suitable for flush mounting and that the orientation of its installation must be vertical. The base is made of thermoplastic, while the frame is made of Polymethyl methacrylate, more commonly known as PMMA, a material that, due to its aesthetics, transparency, and scratch resistance, is considered a lightweight alternative to glass. For hygiene, use a soft cloth slightly dampened with soapy water; do not use cloths and/or abrasive cleaners containing chlorine.

Description

Simon 100 minimum vertical frame with 2 elements 3 modules white gloss SIMON 10002621-130
Simon 100 was born with the aim of simplifying people's lives. Its main feature is usability, as it is designed to facilitate user interaction. It is a revolutionary line in terms of usability, aesthetic and technical innovation, as it is the first interface with push-button actuation designed to be used with the hand.

Its horizontal push-button keys allow for a maximum interaction surface, always of the same size and with the same actuation. Furthermore, the matrix arrangement of the keys is more intuitive and easier to remember. Likewise, the Simon 100 kits group functions minimally for each room, so that users can meet all their needs under a clean aesthetic without lines.

Specifications

Colour	Blanco brillante
EAN	8421053206324
Manufacturer	Simon
Piece type	Frames
Series	Simon 100
