Product sheet

Brand: SIMON

Reference: SIMON 75803-39

3W 24V incandescent lamp. There are many signaling systems available on the market today. Some are of higher or lower quality. They come in large or small sizes. They are more or less functional in their use. One of the most in-demand is, without a doubt, the 3W incandescent lamp included in the Simon 75 series. How does it differ from other products we can find in the sector? For example, its supply is 24V and it has a signaling function. In addition, this incandescent lamp features a device that allows a temperature range of 5 to 40º C and a maximum temperature of -25 to 50º C. All of this while complying with the UNE-EN 60432-1:2001 + A1:2006 standard and with a Neon typology. You cannot ask for more. Well, yes, the ratio between quality and price is unsurpassed.
