Brand: SIMON

Reference: SIMON 46422000-130

Customizable in-table kit with 2 openings, brushes, 4xUSB charger, 4 Schuko sockets and 2 empty modules, white, Simon 400. It is possible to avoid the negative consequences of a fire in an electrical system by trusting the customizable in-table kit with two openings, brushes, 4xUSB charger, four Schuko socket bases and 2 empty modules in white from the Simon 400 series. How does it achieve this? Thanks to its painted steel housing, anodized aluminum profile, covers and fasteners made of halogen-free self-extinguishing thermoplastic. Other of its qualities are: 16A intensity, 250 V voltage, insulation resistance of >5 MO at 500 V, Wieland® gst18i figure connector with three male air poles with a 22 cm lead and dielectric strength without perforation or contouring at 2000 V at 50Hz for one minute. To complete the product installation, it must be combined with Simon 400 functions. All this at the most competitive price we can find in the market.
