Razorback Hardmetal Drill Bit ø22 mm

Brand: BLUEMASTER

Reference: EDM 16078

Razorback hardmetal drill bit ø22 mm, designed for intensive cutting in resistant materials such as stainless steel. Maximum cutting depth of 35 mm, recommended for sheets up to 3 mm thick.

Description

The Razorback hardmetal drill bit ø22 mm is a specialized tool designed for intensive cuts in resistant materials such as stainless steel, copper, and brass. Its construction with TCT (tungsten carbide) coating ensures high resistance to abrasion and cutting efficiency, making it ideal for demanding industrial applications. This drill bit allows reaching a maximum cutting depth of 35 mm, recommended for sheets up to 3 mm thick.

Technical specifications

- Diameter: 22 mm
- Cutting depth: 35 mm

Its robust design and high-durability material ensure consistent performance across a wide range of materials, including fiberglass, nickel, and synthetic materials. It is especially useful in operations requiring precision and cutting resistance, delivering consistent results even under intensive working conditions.

Installation is simple thanks to its standard design, compatible with most drills and conventional machine tools. It is recommended to use it with appropriate speed and feed specifications to achieve optimal performance and tool life.
