Product sheet

Brand: SIMON

Reference: SIMON 44604000-130

Customizable white kit from the Simon 400 series, including brush, cover plate, 2 empty elements, and a base for 4 Schuko-type sockets. Its dimensions are 340x185x85mm, and it is manufactured with a painted steel enclosure, anodized aluminum profile, and covers and fasteners made of halogen-free self-extinguishing thermoplastic. This material ensures low toxicity (in case of smoke emission) and non-flame propagation (in case of fire). It can be installed flush-mounted in furniture using the included claws or via screws through the available holes, always in rooms with a temperature between -5 and 60ºC, approximately. To clean this kit, you only need to use a dry and soft cloth, without resorting to cloths and/or cleaners that contain chlorine in their formula.
