

Product sheet

Brand: SIMON

Reference: SIMON 44603000-138

Customizable in-table kit in black, from the Simon 400 series, with cover and brush, 3 Schuko socket bases, and 3 empty elements. Its elevation is manual, and access to the wiring is achieved via the brush. It has approximate dimensions of 340x185x85mm. It is manufactured with a painted steel enclosure, an anodized aluminum profile, and the covers and fasteners are made of self-extinguishing, halogen-free thermoplastic, which ensures non-propagation of flames in case of fire and a low level of toxicity in case of smoke emission. Cleaning is a fairly simple task, as you only need to use a dry, soft cloth, without ever using cloths or abrasive cleaners containing chlorine in their formula, as this could cause damage and prevent it from functioning correctly.
