Product sheet

Brand: SIMON

Reference: SIMON 44503000-130

Customizable in-table kit, in white, from the Simon 400 series, featuring a cover and brush, 3 Schuko socket bases, and 2 empty elements. Its dimensions are 295x185x85mm, with a current rating of 16A and an operating voltage of 250V. It can be installed flush-mounted in furniture, and for fixing, you can use the claws included in the kit or the screws in the available holes. To complete the installation, you must combine it with Simon 400 functions (references 4000XXX-03X). The housing is made of painted steel, the profile of anodized aluminum, and the covers and fasteners are made of self-extinguishing, halogen-free thermoplastic, which promotes a low level of toxicity (in case of smoke emission) and non-propagation of flames (in case of fire). To clean this kit, you only need to wipe it with a soft, dry cloth and avoid cloths and abrasive cleaners containing chlorine in their formula.
