Product sheet

Brand: SIMON

Reference: SIMON 46402000-130

Customizable in-table kit with 2-opening cover and brushes, 4 Schuko socket bases and 4 empty elements, white Simon 400. If anyone knows how to combine innovative design and maximum safety, it is Simon. In its 400 range, you can acquire the customizable in-table kit with a cover featuring two openings and brushes, four Schuko socket bases, and four empty elements in white. Fire safety, reduced emission of toxic gases, and fire propagation resistance are due to the painted steel enclosure, anodized aluminum profile, covers, and fasteners made of halogen-free self-extinguishing thermoplastic, with which this product has been manufactured. To complete the product installation, with intensity (16A) and voltage (250 V), it must be combined with the functions of the Simon 400 range. Additionally, it has an insulation resistance >5 MO at 500 V, features a Wieland® gst18i connector with three male air poles and a 22 cm pigtail, and provides dielectric strength without perforation or contouring at 2000 V at 50Hz for 1 minute.
