Product sheet

Brand: SIMON

Reference: SIMON 44402000-138

Customizable in-table kit with cover and brush, 2 Schuko sockets and 2 empty elements, in aluminum color, from the Simon 400 series. It has dimensions of 250x185x85mm, its elevation is manual, and access to the wiring is via the brush. It has a current rating of 16A and operates at a voltage of 250V. It is a kit suitable for embedding in furniture using the supplied claws or with screws through the available holes. It works perfectly in rooms with a temperature of -5 to 60ºC, approximately, and its cleaning is very simple to perform, as you only need to use a soft, dry cloth and never use cloths or abrasive cleaners that contain chlorine in their formula, as this could damage the kit and prevent it from functioning correctly. The following materials were used in the manufacture of this kit: painted steel for the housing, anodized aluminum for the profile, and self-extinguishing, halogen-free thermoplastic for the fasteners and covers.
