Product sheet

Brand: SIMON

Reference: SIMON 44601000-130

In-table kit in white, from the Simon 400 series and fully customizable. It includes a cover plate, brush, 1 Schuko socket and 5 empty elements. This kit withstands temperatures above 70ºC and is manufactured with an anodized aluminum profile, a painted steel enclosure, and fasteners made of halogen-free, self-extinguishing thermoplastic. These materials help prevent flame spread in case of fire and ensure low toxicity in case of smoke emission. The kit can be recessed into furniture, and its fixing is done using the provided claws or with screws in the available holes. To clean the kit, you only need to use a soft, dry cloth and never use cloths or abrasive cleaners containing chlorine in their formula, as this could damage it and impair its proper functioning.
