Product sheet

JMA Type C Key Model 35D Resistant

Brand: SCOA

Reference: SCO 29740

JMA Type C Key Model 35D with a robust design for industrial applications. Construction in annealed carbon steel, resistant to corrosion and compatible with standard mounting systems. Dimensions 35mm.

View product online

Description

The JMA Type C Key Model 35D is a mechanical connection device designed for industrial and commercial applications that require secure and durable fastening. Manufactured with annealed carbon steel, it offers corrosion resistance and compatibility with standard mounting systems. Its robust construction allows its use in demanding environments where high mechanical strength and technical precision are required.

Technical Features

- Model: 35D
- Type: C
- Material: Annealed carbon steel
- Dimensions: 35mm

This key provides a solid and reliable connection in applications that require structural strength. Its specific design allows for precise installation and easy handling, optimizing performance in support systems.

Installation is simple and does not require additional specialized tools. It is compatible with standard mounting systems, facilitating its integration into industrial and commercial structural projects.

Specifications

Width	35mm
Material	Acero al carbono recocido
Measures	35mm
Type of installation	C
