Customizable in-table kit with 2-opening cover and brushes, 8 Schuko sockets and 4 empty elements, white, Simon 400. Among the products for furniture integration from the Simon 400 series, the Customizable in-table kit with 2-opening cover and brushes, 8 Schuko socket bases and 4 empty elements in white color stands out, with a current rating of 16A and voltage of 250 V. Why? Perhaps due to the quality of its structure: painted steel housing, anodized aluminum profile, covers and fasteners made of halogen-free self-extinguishing thermoplastic, a life safety feature to prevent flame spread and low smoke toxicity in case of fire. But its advantages do not end there. This kit includes a Wieland® gst18i figure connector with three male aerial poles and a 22 cm lead, insulation resistance of >5 MO at 500 V, and dielectric strength without perforation or tracking at 2000 V at 50Hz for one minute. To complete the product installation, it must be combined with Simon 400 functions.
