Customizable in-table kit with 2-opening cover and brushes, 2 Schuko sockets and 6 empty elements, white, Simon 400. The customizable in-table kit with a cover featuring two openings and brushes, two Schuko socket bases, and six empty elements in a white finish from the Simon 400 series is the perfect product to complete electrical installations in all types of projects. Its qualities, along with its excellent value for money, have made it the first choice for both individuals and professionals. Furthermore, this kit, with an intensity of 16A and a voltage of 250 V, is compatible with the rest of the functions in Simon's range. It has a very durable structure made with a painted steel enclosure, an anodized aluminum profile, covers and fasteners in self-extinguishing, halogen-free thermoplastic. It features a Wieland® gst18i connector with three male poles, an aerial pigtail of 22 cm, an insulation resistance of >5 MO at 500 V, and dielectric strength without perforation or tracking of 2000 V at 50Hz for one minute are among its other characteristics.
