# Product sheet

Brand: SIMON

Reference: SIMON 46605000-138

Customizable in-desk kit with 2-opening cover and brushes, 10 Schuko sockets and 2 empty elements, black Simon 400. Among the devices for furniture embedding from the Simon 400 series, the customizable in-desk kit with a cover featuring two openings and brushes, ten Schuko socket bases for standard current circuits, and two empty elements in black stands out. Insulation resistance of >5 MO at 500 V, current of 16A, Wieland® gst18i figure connector with three male poles and a 22 cm pigtail, voltage of 250 V, and dielectric strength without perforation or contouring at 2000 V at 50Hz for 1 minute are other of its characteristics. Why is this kit so resistant and safe? Due to the painted steel enclosure, anodized aluminum profile, covers and fasteners made of self-extinguishing, halogen-free thermoplastic, materials that guarantee non-flame propagation in case of fire and low toxicity in case of smoke emission. To complete the product installation, it must be combined with the Simon 400 functions.
