# Product sheet

Brand: SIMON

Reference: SIMON 46601000-138

Customizable in-table kit with 2-opening cover and brushes, 2 Schuko sockets and 10 empty elements, black, Simon 400. In the Simon 400 series catalog, the customizable in-table kit with a two-opening cover and brushes, two Schuko socket bases, and ten empty elements in black stands out, suitable for flush mounting in furniture. What are its most notable features? Current rating (16A), voltage (250 V), insulation resistance (>5 MΩ at 500 V), connector (Wieland® gst18i with three male poles, aerial connection with 22 cm lead), and dielectric strength (withstands 2000 V at 50Hz for 1 minute without breakdown or tracking). Its structure is impact-resistant and highly durable over time, thanks to the painted steel housing, anodized aluminum profile, and covers and fasteners made of self-extinguishing, halogen-free thermoplastic—materials designed to minimize fire risks. It also stands out for its low price. It is compatible with the rest of the products in the Simon 400 series.
