Product sheet

Brand: SIMON

Reference: SIMON 46605000-130

Customizable in-table kit with a cover featuring two openings and brushes, ten Schuko socket outlets, and 4 empty elements in black is one of the most in-demand products among individuals and professionals in the Simon 400 series. Its structure is impact-resistant and highly durable over time, thanks to its painted steel housing, anodized aluminum profile, covers, and fasteners made from halogen-free self-extinguishing thermoplastic. These materials are designed to guarantee risk mitigation in the event of a fire. What are its most notable features? Current rating (16A), voltage (250 V), insulation resistance (>5 MΩ at 500 V), connector (Wieland® gst18i with three male air poles and a 22 cm pigtail), and dielectric strength (withstands 2000 V at 50Hz for 1 minute without breakdown or tracking). It is compatible with the rest of the products in the Simon 400 series.
