Product sheet

Brand: SIMON

Reference: SIMON 42605000-130

Customizable tabletop kit with 5 Schuko socket bases and 1 blank element, white, Simon 400 series. Customizable tabletop kit with 5 Schuko socket bases and 1 blank element, in white color, belonging to the Simon 400 series. It has dimensions of 295x120x80mm and its elevation is manual. Additionally, it has a current rating of 16A and operates at a voltage of 250V. The decorative cover is made of painted steel, the profile of anodized aluminum, and the covers and fasteners of halogen-free, self-extinguishing thermoplastic, which is a very safe material as it favors non-propagation of flames (in case of fire) and a low level of toxicity (in case of smoke emission). For cleaning, you only need to use a dry and soft cloth, without ever resorting to abrasive cleaners and/or cloths that contain chlorine in their formula, as it could get damaged and not offer its functions correctly.
