

Product sheet

Brand: SIMON

Reference: SIMON 27134-62

Bipolar switch with a rating of 16AX and a voltage of 250 V, featuring an integrated pilot light and a screw terminal system, finished in Marfil color and belonging to the Simon 27 Play series. To facilitate installation, you can choose to install it surface-mounted or flush-mounted. The quality of the metal components with halogen-free insulation and the thermoplastic cover is top-notch, ensuring that temperature does not compromise performance. The dimensions to consider for proper installation are 45x45mm. Take advantage of the base from the Simon 27 Play series to enjoy decorating; experience the revolutionary concept that allows you to take the lead when redecorating the spaces in your home.

Description

Simon 27 16A wide bipolar switch with ivory pilot light SIMON 27134-62

The **Simon 27** series is one of Simon's most versatile and colorful mechanism series. It features a wide range of interchangeable frames and covers to maximally adapt to the needs of each project.

Although the mechanism is shared across the different variants of the series, the frames offer a wide range of possibilities.

On one hand, there is the classic **Simon 27** series, with frames featuring intermediate and external trim pieces, with more rounded finishes.

On the other hand, there are the frames of the **Simon 27 NEOS** series, finished in matte or glossy glass, with soft and bold colors, giving it a completely different look from the classic series.

Finally, the **PLAY** range changes the appearance of the frames, available in two colors, white and ivory, but with a multitude of interchangeable covers, from the simplest to the boldest and most unrestrained.

In addition, this mechanism is also suitable for the **Simon 44 Aqua** series, Simon's waterproof series.

Specifications

Colour	Marfil
EAN	8421053036020
Manufacturer	Simon
Piece type	Electrical mechanisms
Series	Simon 27
