Product sheet

Brand: SIMON

Reference: SIMON G301C

Plastic tray for circular floor box with reduced depth in pavement for 6 elements Simon 500 Cima. This product from the Simon 500 Cima range is the ideal tray for circular floor boxes with low depth, especially when installed directly in the pavement. The floor box it complements must provide electrical power to a total of 6 elements. Due to its beautiful and original green color, it is recommended to install this tray in circular floors of similar or complementary tones. Its installation is very simple, and it is advised that the floor covering be placed up to the entrance of the cover plate for perfect integration into the room's environment. The tray for low-depth circular floors measures 419x384x54 millimeters in depth and is designed with high-quality thermoplastic materials. This type of material increases the product's safety and is undoubtedly an added value, as it helps prevent the spread of flames in case of a fire and reduces the toxicity of the smoke produced.
