Product sheet

Brand: SIMON

Reference: SIMON K301

16AX 250V Switch with quick connection system Simon K45. With dimensions of 22x45mm, the rocker-operated switch from the Simon K45 collection offers maximum functionality and innovation for your work area. Featuring a quick connection system that requires no additional tools, this switch is designed for both flush and surface mounting to ensure complete integration of the assembly into the space. Compatible with a supply voltage of 250 Volts and a current of 16AX, it accepts a cable cross-section of up to 1.5mm with a cable stripping length of 11mm. It is manufactured with metallic components, halogen-free insulation, and thermoplastic trim pieces for enhanced room protection in case of fire. Thanks to its composition materials, it can operate within a temperature range of 5 to 40 ºC, with extremes ranging between -25 and 50 ºC. Please note during installation that combining two control mechanisms with a narrow tecla on Simon 500 to Simon K45 adapter plates is not permitted.
