Product sheet

Brand: SIMON

Reference: SIMON K115/9

Key with indicator for 1-gang illuminated switch, white, Simon K45. With the versatility of white finishes that blend with all types of environments, the key with indicator for the switch from the Simon 45 collection achieves the perfect balance between innovation, functionality, and design. The key with indicator in this range includes a status indicator to show whether the load it controls is on or off. However, two control mechanisms with a narrow key cannot be combined on a Simon 500 Cima to Simon 45 adapter plate. It is made of halogen-free thermoplastic, to protect the room from flame spread and smoke toxicity in case of fire. It can reach temperatures above 60 ºC, with an installation range of -5 to 60 ºC. It has dimensions of 45x22.5mm and a depth of 10mm, and is designed for both flush and surface mounting, and includes a signaling function to mark the mechanism and locate it in moments of low lighting.
