Product sheet

Brand: SIMON

Reference: SIMON K112/14

Key with display for 1-gang illuminated switch, graphite, Simon K45. With the graphite-finish display key for the switch from the Simon 45 collection, you can always check the status of the load, as it indicates whether the device it controls is on or off. It has dimensions of 45x45mm and a depth of 10mm, for a half-gang element, although a version for 4 gangs is also available. Designed for flush or surface mounting, the Simon 45 display key is made of halogen-free thermoplastic that prevents flame spread and smoke toxicity in case of fire. It can withstand temperatures above 60 ºC. With a design adapted to the needs of each space, graphite finishes, and a signaling function with load status indicator, the Simon 45 display key is perfect for achieving maximum functionality in your work area.
