Product sheet

Brand: SIMON

Reference: SIMON K112/9

Key with display for 1-gang illuminated switch, white, Simon K45. Key with display for a 1-gang illuminated switch, in white finish, from the Simon K45 series. It is available in a 45x45mm (half-module) version and is used to check, via the status indicator, whether the load being controlled is on or off. It is suitable for both surface and flush mounting and perfectly withstands temperatures between 5 and 60ºC, approximately, although it can also function correctly in rooms with extreme temperatures above this maximum. It complies with the UNE-EN 60669-1:2002 + A1:2003 + A2:2009 standards and is made of halogen-free thermoplastic, a material that guarantees non-flame propagation in case of fire and low toxicity in case of smoke emission. Its dimensions are 45x45x10mm, and to clean it, you only need to wipe it with a soft, dry cloth, without ever using cloths and/or abrasive cleaners containing chlorine.
