Product sheet

Brand: SIMON

Reference: SIMON 27202-65

10AX 250V Switch with integrated pilot light and quick connection system, white, Simon 27 Play. Efficiently combining a neutral line design that fits today’s trendy modern, simple, and functional environments with a touch of color in all items is one of the features of the Simon 27 Play series. Here we have the 10AX 250V Switch with integrated pilot light and quick connection system in white finish, a piece compatible with reference 2700802-037 in case of replacement of the luminous indicator. For installation, the use of a universal flush-mounted box vil544 is required, or alternatively a surface-mounted base, with a rocker operation. It has two modules, dimensions of 45x45mm, and an indicator consumption of 0.55 mA, and is designed to withstand low and high temperatures, making it perfect for large public and private buildings.

Description

Wide pilot switch Simon 27 snow white SIMON 27202-65

The **Simon 27** series is one of Simon's most versatile and colorful mechanism series. It features a wide range of interchangeable frames and covers to best adapt to the needs of each project.

Although the mechanism is shared across the different variants of the series, the frames offer a wide range of possibilities.

On one hand, there is the classic **Simon 27** series, with frames featuring intermediate and external trim pieces, with more rounded finishes.

On the other hand, there are the frames of the **Simon 27 NEOS** series, finished in matte or glossy glass, with soft and bold colors, giving it a completely different look from the classic series.

Finally, the **PLAY** range changes the appearance of the frames, available in two colors, white and Marfil, but with a multitude of interchangeable covers, from the simplest to the boldest and most unrestrained.

In addition, this mechanism is also suitable for the **Simon 44 Aqua** series, Simon's waterproof series.

Specifications

Colour	White
EAN	8421053035979
